Pre-op Instructions for Rabbits, Guinea Pigs and Other Small Furrries

It is important to follow these instructions carefully as they will make your pets stay with us more comfortable.

Your pet must **NOT** be starved prior to the operation.
Food and water must be freely available until you bring them in for surgery.

If you can bring in some of their usual food with them, it can be useful for tempting animals to eat after the operation, which is very important for these animals.

Please **DO NOT** line their carrier basket with hay, straw or sawdust.
Newspaper or an old towel in the bottom of the basket is just as good and far less messy!

When you arrive at the surgery you will have an appointment with a nurse who will go through the admissions procedure including the signing of an anaesthetic consent form.

Please ensure all contact numbers are reachable for **ALL TIMES** of the day.

We will ask you to contact the surgery between 1pm-2pm to inquire after your pet and to arrange a collection time.

Payment for operations is expected at time of collection.
We can provide an estimate on request and any concerns regarding payment **MUST** be addressed to a member of staff prior to admission or treatment. We accept cash and debit/credit cards
